

Electric Lighting Volume 1

By Francis Bacon Crocker

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 156 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 edition. Excerpt: . . . by water or oil pressure. The power required is taken from the main shaft by a belt to the large pulley in Fig. 73c. A double-beveled friction-wheel is keyed to the shaft, to which this pulley is also keyed. On each side of the friction-wheel is a frictionpan carrying a spur-pinion and mounted loosely upon the shaft. These pinions engage with gears on a back shaft, one directly and the other through an intermediate gear, thus giving reverse movements. A thrust-collar attached to the pulley-shaft enables the friction-wheel to be forced against either friction-pan by means of a fork connected to the mechanism of a centrifugal governor through a lever and crank. Any speed above or below normal causes the gate to close or open since it is connected to the back shaft. The governor is driven by a belt on a small pulley...

Reviews

This composed book is fantastic. it absolutely was writtern quite properly and helpful. I am very happy to explain how this is the very best ebook i actually have read during my own existence and may be he best pdf for actually.

-- Prof. Elody D'Amore

I just started looking over this ebook. It is actually rally fascinating throgh reading period of time. You wont really feel monotony at anytime of your time (that's what catalogues are for about when you request me).
