By William Dymock

TheClassics.us. Paperback. Book Condition: New. This item is printed on demand. Paperback. 194 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 edition. Excerpt: ...

Description. -- Climbing, all softly silky; leaves small, cm longish petioles, simple or ternately divided, elliptic ovate or cordate, 3-nerved. Pauicle many flowered; lower bracts leafy, flowers 11 to 2 indies diam. , white, appear in September; sepals 4 to 6, membranous, oblong, silky outside; filaments narrow, linear, glabrous. Many other species of Clematis grow in the temperate Himalaya, but do not appear to be used medicinally. ACTA SPICATA, Linn. , Eng. Hot. 18, 918. Baneberry (Eng.), Racine de Saint Christophe (Fr.). Grows in the temperate Himalaya from Bhutan to Hazara; it is also a European plant, and a variety with red berries is well known in America. It does not appear to be known as a medicinal plant to the Hindus; its chemical constitution is the same as that of Cimifuga racemosa. (See next article.) It is probably the Actaea...
