Excerpt: . . . Executive Summary 2 receiving free or reduced-price lunches. The sites were geographically dispersed and represented a range of district enrollment sizes. A majority of the districts were located in large urban or suburban areas with only three sites in rural districts. All participating schools were middle schools that included only grades 6 through 8. The average enrollment in these schools is 871 and ranges between 462 and 1,404 students. Minority students compose 65 percent of the student body, on average, and range between 15 percent and 100 percent. The average percentage of students receiving free or reduced-price lunches is 56 percent and ranges between 16 percent and 97 percent. There were no statistical differences between the intervention and control groups on these characteristics. Student Sample The impact analysis for the main findings uses a cross-sectional sample in each school. The first-year analysis used data collected from a...
