

A Method for Solve the Nonlinear Fractional Differential Equations

By Constantin Milici

LAP Lambert Academic Publishing Okt 2014, 2014.

Taschenbuch. Book Condition: Neu. 220x150x7 mm. Neuware - In this book is presented a new method introduced in order to establish solutions for fractional differential equations. This method is based on a combination of Adomian decomposition method and Laplace transform method. This new method can be applied to linear and nonlinear fractional differential equations. The method is illustrated on a series of examples including ordinary differential equations and systems of differential equations, partial differential equations and systems. The method can be used with the aid of symbolic calculus. For this reason we are suggested some Maple and Mathematica solutions of the examples investigated. 112 pp. Englisch.

Reviews

Most of these ebook is the best publication available. It is definitely simplistic but unexpected situations within the 50 percent of the book. You will not sense monotony at any moment of the time (that's what catalogs are for relating to in the event you request me).

-- King Wunsch

Comprehensive manual for publication lovers. We have read through and so i am confident that i am going to go to read yet again once more down the road. I am easily could get a enjoyment of looking at a created pdf.
